

## Summer Math Packet

Dear Fifth Grade Havel Family,

The fifth grade summer “Math Practice Packet” for students is in the back of their math book , the packet will be split into two parts. For July they are being asked to complete pages P245-P266 (lessons 1-10). For August they should complete pages P267-P292 (lessons 11-20). The goal is to help keep students engaged and review concepts they learned this school year. We are planning TWO summer events to celebrate all students who complete their packets. One packet will be due mid to end of July and the other due mid to end of August. Havel teachers will be at the event to collect the packets and celebrate student’s hard work. In addition to the summer packet we highly recommend that students continue to memorize ALL the basic facts up to 12s (+, -, x,  $\div$ ).

There will be a phone blast announcing the date time and location of the Summer Math Packet “reward”.

Your Dedicated Havel Staff
